
 Here, at the Road To Agincourt office, we are very excited because our brand new waymarkers for the King's Great Ships Trail have arrived!

The official waymarkers were designed by The Sorting Office's resident, Mariska Parent, and feature embedded Augmented Reality technology which will bring the history of the Great Ships from the Battle of Agincourt to life.

Visitors to the trail at Manor Farm and Country Park will need to download the free  Zappar app from their app store to fully enjoy the interactive experience. You can even test the app on our photo of the code above, for a sneak peek of what you can experience on the King's Great Ships Trail.

We're very excited to get down to the Manor Farm and Country Park to install them. More updates will be coming soon!

For more information on the design of the way-markers, watch our video interview with designer Mariska Parent [here](#).
