

Calling all web developers, 3D/2D artists, augmented reality experts and more – we need your help to create a [virtual museum](#) for one of Hampshire’s most significant historical landmarks; King Henry V’s flagship, the *Grace Dieu*.

Once one of the largest ships in the world, the *Grace Dieu* was a huge development in medieval shipbuilding technology and stood as an inspiring symbol of power for the King after his famous victory in Agincourt. Unfortunately, she only made one voyage before being struck by lightning and burnt to the waterline while laid up in the River Hamble, where the ship still lies today, buried in the mud.

Until now

As the culmination of the two-year [Road to Agincourt](#) project run by Eastleigh Borough Council, the Virtual Museum will provide an innovative online experience to educate visitors from around the world on the importance of our region in the run-up and aftermath of the battle, 600 years on.

Your talents rewarded

We will provide a full budget for freelancers and businesses with skills we need; whether you are a concept artist, 3D modeller or a web designer, there are paid roles available.

Our memories shared

Along the Road to Agincourt, we have worked with leading historians, archaeologists, authors, performers and more: the Virtual Museum will be the culmination of all of their hard work.

Please note that you must be a fully registered Eastleigh Tec Hub member or Digital Associate if you wish to qualify for the submission process. For more information and for an application form, please visit [www.techub-eastleigh.co.uk/virtual-museum-project-pitch](http://www.techub-eastleigh.co.uk/virtual-museum-project-pitch).

Be quick, the deadline for proposal submissions is 19th December.
